SIEMENS

Data sheet 6GT2780-0DB30

product type designation	**Meldungsmanagement fuer Locating Manager Basic, 10000**
product description	The message management notifies the user about specific events occurring
	SIMATIC RTLS Locating Manager message management 10,000 for 10,000 transponders, option for license Basic, single license, software and license key download - - email address required for delivery .

product brand name	SIMATIC RTLS
Technical Product Detail Page	https://i.siemens.com/1P6GT2780-0DB30
software version	V2.13.0.0
product functions	
product version	add-on license for Locating Manager Basic 10000
product description	The message management notifies the user about specific events occurring
product options	Important events are detected in the system and are retained for further processing (e.g. connection abort, server restart) / Reactions to the events can be configured: Database entry, e-mailing, Windows messaging, SNMP traps / EventLogViewer for filtering, searching and displaying of database entries
PROFINET conformity class	F
product function	
● web-based management	No
● MIB support	No
● TRAPs via email	Yes
● configuration with STEP 7	No
● PROFINET IO diagnosis	No
protocol / is supported	
● SSH	No
● HTTP	No
● HTTPS	No
● NETCONF	No
● DCP	No
● LLDP	No
● SNMP v1	No
● SNMP v2	No
● SNMP v2c	No
● SNMP v3	No
● IGMP (snooping/querier)	No
national language	
● of the software	German
● of the documentation / German	Yes
● of the documentation / English	Yes
● of the documentation / French	No
● of the documentation / Chinese (simplified)	Yes
software requirements / header	
operating system	
● usable / Windows 10	Yes; clients

Subject to change without notice

● usable / Windows 7	No; nur für Clients
● usable / Windows 2016 Server	Yes; server and clients
● usable / Windows 2012 Server	No
● usable / Windows 2008 Server	No; As of R2
● usable / Windows Server 2019	Yes; server and clients
browser software / required	no
hardware requirements	
processor clock frequency / minimum	2 Hz; GHz (dual core processor)
storage capacity	
● of the work memory / required / minimum	2000 Mibyte
● on hard disk / required	2 Gibyte
● on hard disk / recommended	100 Gibyte

security information	
security information	Siemens provides products and solutions with industrial cybersecurity functions that support the secure operation of plants, systems, machines and networks. In order to protect plants, systems, machines and networks against cyber threats, it is necessary to implement - and continuously maintain - a holistic, state-of-the-art industrial cybersecurity concept. Siemens' products and solutions constitute one element of such a concept. Customers are responsible for preventing unauthorized access to their plants, systems, machines and networks. Such systems, machines and components should only be connected to an enterprise network or the internet if and to the extent such a connection is necessary and only when appropriate security measures (e.g. firewalls and/or network segmentation) are in place. For additional information on industrial cybersecurity measures that may be implemented, please visit www.siemens.com/cybersecurity-industry. Siemens' products and solutions undergo continuous development to make them more secure. Siemens strongly recommends that product updates are applied as soon as they are available and that the latest product versions are used. Use of product versions that are no longer supported, and failure to apply the latest updates may increase customer's exposure to cyber threats. To stay informed about product updates, subscribe to the Siemens Industrial Cybersecurity RSS Feed under https://www.siemens.com/cert. (V4.7)
