SIEMENS

Data sheet 6GT2780-0FB00

product type designation	**Locating Manager Budget Perpetual**
product description	License for micro-projects up to 100 transponders. Must be purchased in combination with SUS license 6GT27801FB00.
	SIMATIC RTLS Locating Manager Budget Perpetual installations in one plant, software and license key through OSD download - - email address required for delivery
product brand name	RTLS
Technical Product Detail Page	https://i.siemens.com/1P6GT2780-0FB00
software version	V3.0
product license	
● Software Update Service	No
product license	T
product functions	
product version	server application for position calculation based on the signals of the SIMATIC RTLS devices
product description	License for micro-projects up to 100 transponders. Must be purchased in combination with SUS license 6GT27801FB00.
PROFINET conformity class	F
product function	
● web-based management	Yes
● TRAPs via email	Yes
● backup device configuration	Yes
● restore device configuration	Yes
● firmware management	Yes
● remote firmware update / topology-dependent	Yes
protocol / is supported	
● HTTPS	Yes
● DCP	No
● EtherNet/IP protocol	Yes
national language	
● of the software / multilingual	Yes
● of the documentation / German	Yes
● of the documentation / English	Yes
● of the documentation / Chinese (simplified)	Yes
software requirements / header	
operating system	
● usable / Windows 10	Yes; clients
● usable / Windows Server 2019	Yes; server and clients
browser software / required	T
software / required	Chrome, Firefox, Edge

security information	
security information	Siemens provides products and solutions with industrial cybersecurity functions that support the secure operation of plants, systems, machines and networks. In order to protect plants, systems, machines and networks against cyber threats, it is necessary to implement - and continuously maintain - a holistic, state-of-the-art industrial cybersecurity concept. Siemens' products and

	solutions constitute one element of such a concept. Customers are responsible for preventing unauthorized access to their plants, systems, machines and networks. Such systems, machines and components should only be connected to an enterprise network or the internet if and to the extent such a connection is necessary and only when appropriate security measures (e.g. firewalls and/or network segmentation) are in place. For additional information on industrial cybersecurity measures that may be implemented, please visit www.siemens.com/cybersecurity-industry. Siemens' products and solutions undergo continuous development to make them more secure. Siemens strongly recommends that product updates are applied as soon as they are available and that the latest product versions are used. Use of product versions that are no longer supported, and failure to apply the latest updates may increase customer's exposure to cyber threats. To stay informed about product updates, subscribe to the Siemens Industrial Cybersecurity RSS Feed under https://www.siemens.com/cert. (V4.7)
