

product type designation

product description

Distance piece for RF620T

Support for mounting transponders with a size of 127 mm x 38 mm and 12 mm distance to metal

SIMATIC RF600 spacer for RF620T 155x 38x 12 mm (LxWxH), -25 to +70 °C
Minimum order quantity: 20.

product brand name

SIMATIC RF

Technical Product Detail Page

<https://l.siemens.com/1P6GT2898-2AA00>

suitability for use

The support is mounted using two M5 screws or 2 cable clamps. The transponder is snapped into place and can also be secured with screws

suitability for operation

for transponders RF620T

mechanical data

material

PP

color

anthracite

ambient conditions

ambient temperature

- during operation -20 ... +55 °C
- during storage -25 ... +70 °C
- during transport -25 ... +70 °C

design, dimensions and weights

width

38 mm

height

12 mm

depth

155 mm

Security information

security information

Siemens provides products and solutions with industrial cybersecurity functions that support the secure operation of plants, systems, machines and networks. In order to protect plants, systems, machines and networks against cyber threats, it is necessary to implement - and continuously maintain - a holistic, state-of-the-art industrial cybersecurity concept. Siemens' products and solutions constitute one element of such a concept. Customers are responsible for preventing unauthorized access to their plants, systems, machines and networks. Such systems, machines and components should only be connected to an enterprise network or the internet if and to the extent such a connection is necessary and only when appropriate security measures (e.g. firewalls and/or network segmentation) are in place. For additional information on industrial cybersecurity measures that may be implemented, please visit www.siemens.com/cybersecurity-industry. Siemens' products and solutions

undergo continuous development to make them more secure. Siemens strongly recommends that product updates are applied as soon as they are available and that the latest product versions are used. Use of product versions that are no longer supported, and failure to apply the latest updates may increase customer's exposure to cyber threats. To stay informed about product updates, subscribe to the Siemens Industrial Cybersecurity RSS Feed under <https://www.siemens.com/cert>. (V4.7)
