

## SINGLE-PORTED GLOBE CONTROL VALVES TYPE Z<sup>®</sup>

### APPLICATIONS:

Single-ported globe control valves type Z<sup>®</sup> are used in automatic and remote control systems to control flow of gases and liquids. Wide range of material and design versions make the valves widely sought-after in chemical industry, heat and power generation industry, paper industry, food industry, metallurgy and coal mining (versions for Western Europe market is marked: BR11).

### CHARACTERISTICS:

- range of nominal sizes from DN15 to DN250 for pressure values PN10 to CL300,
- various materials of valve body cast and internal parts, adapted to specific working conditions,
- wide range of flow ratios and control characteristics,
- reduction in aggressive and toxic media emissions to environment through application of bellow seal bonnets or bonnet packings meeting requirements of TA - LUFT,
- easy assembly and dismantling of valve internal parts for maintenance and service,
- high durability and reliability due to application of top-class materials and surface improvement processes (burnishing, stellite, heat treatment, CrN coatings),
- possibility of mating with reversible action P/R (column) multi-spring actuators and changing the spring range with no extra parts (keeping the number of springs),
- possibility of fitting actuators with top drive,
- possibility of performing diagnostics of “valve-actuator” system due to application of smart electro-pneumatic positioners,
- high tightness of closure due to application of soft valve seats (with PTFE seals in the whole range of flows and characteristics, for valve plugs, balanced and unbalanced,
- same flow ratios and control characteristics for “hard” valve seats (metal-to-metal) and “soft” valve seats (metal-gasket), for valve plugs, balanced and unbalanced,
- reliable actuator-stem and valve seat-body connections,
- small guiding sleeve control forces due to application of balanced valve plugs in valves DN40...250,
- top-class flat and bonnet packings,
- wide range of electric actuators,
- possibility of mating with NN type hand operated drives,
- possibility of special executions for oxygen, hydrogen, gas fuels, low temperature mediums (liquid oxygen, liquid nitrogen), acid gases containing H<sub>2</sub>S; explosive atmospheres as per 94/9/EC - ATEX,
- competitive prices – due to simple and functional design of valves and actuators and applied materials,
- design and production process meets the requirements of Quality Management System ISO 9001 and Directive 97/23/EC, and regulations of AD2000 Merkblatt, designated for installation on pipelines,

Z<sup>®</sup> is a trademark registered with Republic of Poland Patent Office.

**DESIGN AND TECHNICAL SPECIFICATION:**

**Body (1):** single-ported, flanged, cast in cast iron or cast steel.

Nominal sizes: DN15; 20; 25; 32; 40; 50; 65; 80; 100; 125\*; 150; 200; 250

\* special execution, technical data according to individual inquiries.

Nominal pressure: PN10; 16; 25; 40 (as per PN-EN 1092-1:2010 and PN-EN 1092-2:1999); CL150; CL300 (as per PN-EN 1759-1:2005).

Steel flanges CL150; CL300 are so designed that they can be assembled with flanges executed per American standards ANSI/ASME B16.5 and MSS SP44. In American standards flanges are identified with nominal values in "Classes", to which nominal pressure (PN) values as per PN-ISO 7005-1:2002 correspond.

Equivalent identification as per PN are: CL150: PN 20 and CL300: PN 50.

Table 1. Flanged end connections

Material	Nominal pressure	Facing of flange types			
		Raised face	Groove	Recess	Ring - joint
Grey iron	PN10; 16	B <sup>2)</sup>	-	-	-
Spheroidal iron	PN10; 16; 25; 40		-	-	-
Cast steel	PN10; 16; 25; 40		D	F	-
	CL150		-	-	J (RTJ)
	CL300		DL (D1 <sup>1)</sup> )	F (F1)	
<sup>1)</sup> - only for CL300; <sup>2)</sup> - B1 - (Ra=12.5 mm, concentric surface structure "C"), B2 - (Ra as agreed with the customer); () - identification of connections as per ASME B16.5					
Possible execution of flanges per specification and indicated standards					

Face-to-face dimensions: as per PN-EN 60534-3-1; 2000r. - Fig. no. 7 ; Table 19 and 20. Series 1 - for PN10; 16; 25; 40; series 37- for CL150; series 38 - for CL300

**Bonnet (2)** - non-cast - assembled to body via assembly plate (DN15-100)  
 - cast (DN150-250): a) standard, b) extension (for cast steel valves),  
 c) bellows (for cast steel valves).

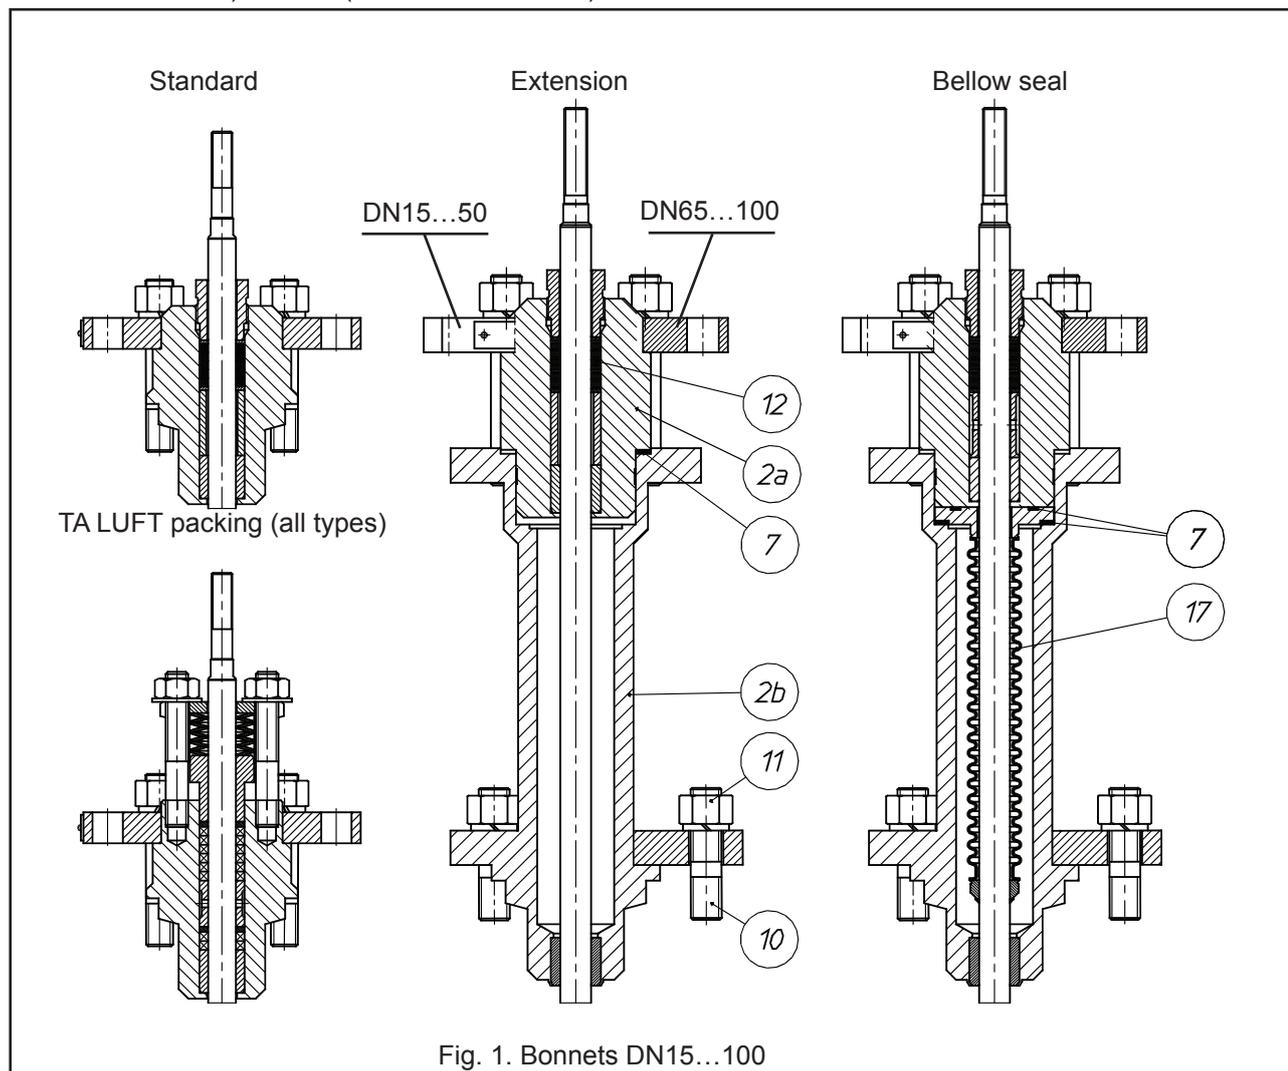

Fig. 1. Bonnets DN15...100

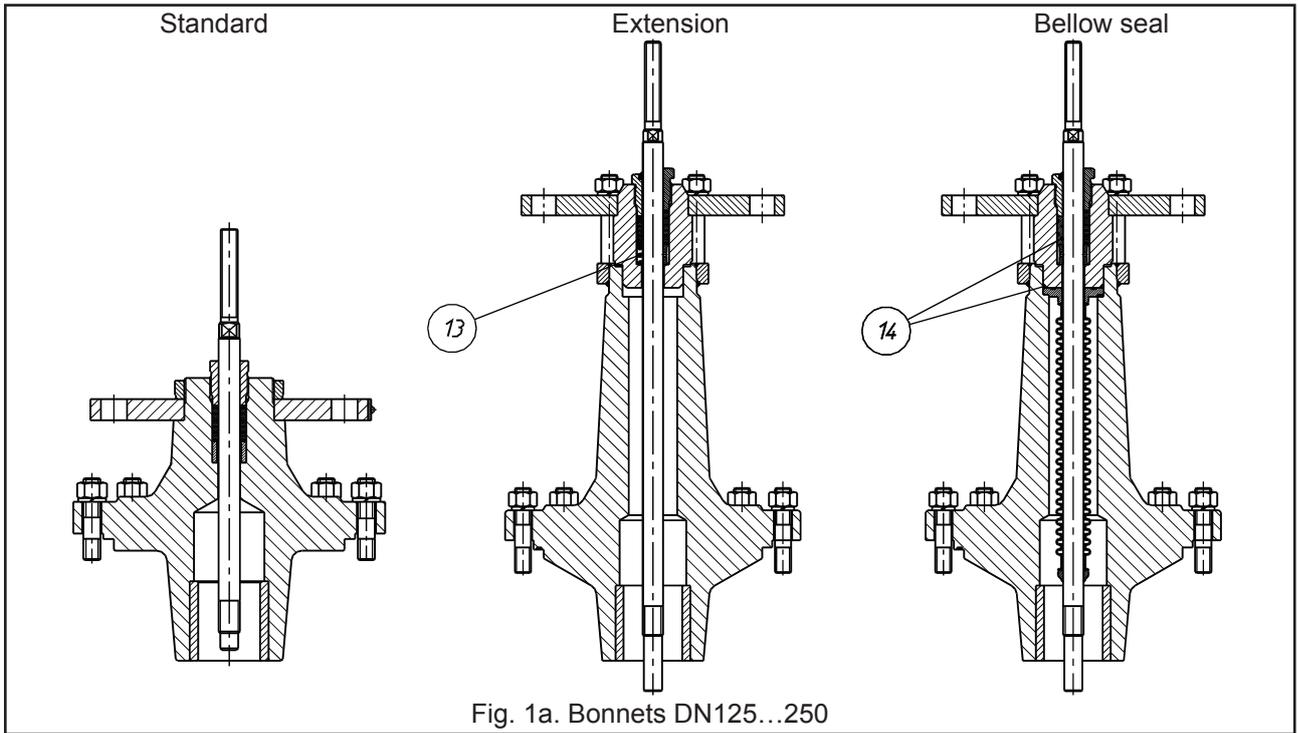

Fig. 1a. Bonnets DN125...250

**Valve plug (3)** - contoured, balanced, unbalanced

- control characteristics:
  - linear (L)
  - equal percentage (P)
  - quick-opening (S)
- rangeability:
  - 50:1

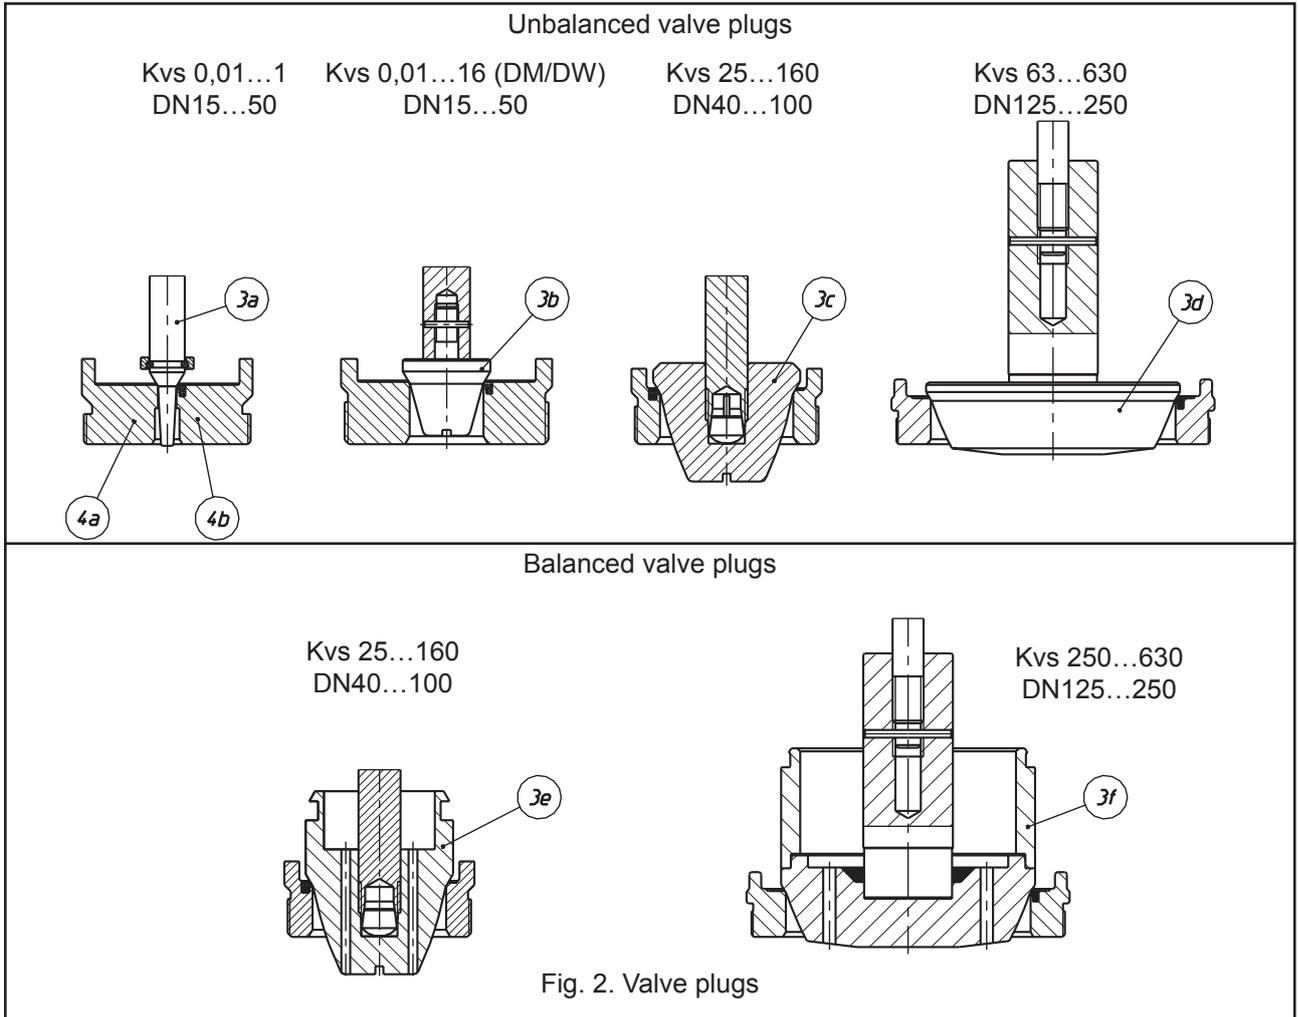

Fig. 2. Valve plugs

**Valve seat (4)** - screwed in, with centering cone, sealing and preventing unscrewing:

- hard version,
- soft version (PTFE packing).

**Valve plug stem (5)** - burnished or quenched and tempered, polished sealing contact surface

**Drain plug (6)** - steel or stainless steel: allows cleaning of body interior (delivered separately)

**Body gasket (7)** - asbestos-free:

- flat – aramid and hardened graphite (1.4571); in metallic casing (1.4571), multiple edges
- bonnet: - packings formed in various materials (PTFE-V; PTFE+graphite; expanded graphite; braided graphite);  
- with TA Luft compression springs (PTFE-V; graphite)

Table 2. Packing types with application ranges.

Packing	PN / CL	Temperature [°C]		
		Bonnet		
		Standard	Extension	Bellow
PTFE-V	PN10...CL300	-46...+200	-198...-46 +200...+300	-100...+200
PTFE + Graphite				
PTFE-V / TA-LUFT		+200...+300	+300...+450	+200...+400
Graphite				
Graphite / TA-LUFT				

**Leakage class:** - basic: Class IV as per PN-EN 60534-4 - hard valve seat  
- bubble-tight: Class VI as per PN-EN 60534-4 - soft valve seat

**NOTE:**

Hardening method used for hardening of valve internal parts comprises:

- stelliting – padding of surfaces with stellite: ~40HRC
- CrN coating – introducing chromium nitride to external layer of detail, to the depth of ca.0.1 mm;~950HV
- heat treatment: plug (~45HRC), seat (~35HRC), stem (~35HRC), guide sleeve (~45HRC)
- Maximum working temperature -200...+250°C (for KEFLOY 25 material), higher temperatures: upon consultation with the manufacturer.

Table 4. Working parameters for special executions of valves.

Valve execution	Working temperature [°C]		Max working pressure [bar]
	Min.	Max.	
With balanced plug	-50	+200	40
With soft valve seat (PTFE)	-100	+400	35
With bellow seal bonnet	-100	+400	35

**NOTES:**

1. It is allowed to apply spheroidal iron, carbon steel and acid proof cast steel for temperatures lower than given in Tables 5...11, provided that working pressure is reduced respectively, working temperature impact tests are performed and cast is heat treated. Details are to be consulted with manufacturer.
2. Working pressure for intermediate temperature values can be calculated by interpolation.

**ALLOWABLE PRESSURE DROPS  $\Delta p$ .**

Pressure drops  $\Delta p$  [bar] in Tables 15 and 16 apply to closed valve and they are calculated for valve drive potential. Actual pressure drops should not exceed 70% of allowable working pressure for given nominal pressure, material execution and working temperature, as per tables 5...11.

$$\Delta p = \frac{F_s - F_D - F_T}{0,785 \cdot 10^{-4} \cdot D^2} \quad \text{or} \quad F_s = 0,785 \cdot 10^{-4} \cdot D^2 \cdot \Delta p + F_D + F_T$$

where  $\Delta p$  [bar] - calculated pressure drop  
 $F_s$  [kN] - actuator available force (Table 14)  
 $F_D$  [kN] - valve plug to valve seat pressure (Table 12)  
 $D$  - valve seat diameter [mm] (Table 12)

Table 14. Available force  $F_s$  [kN] of pneumatic actuators

Actuator size	Direct actuator P			Reverse actuator R					
	Supply pressure [kPa]			Spring range [kPa]					
	140	250	400	20 - 100	40 - 120; 40 - 200	60 - 140	80 - 240	120 - 280	180 - 380
250	1,0	3,8	7,5	0,5	1,0	1,5	2,0	3,0	-
400	1,6	6,0	12,0	0,8	1,6	2,4	3,2	4,8	-
630	2,5	9,5	18,9	1,3	2,5	3,8	5,0	7,6	11,3
1000	4,0	15,0	30,0	2,0	4,0	6,0	8,0	12,0	18,0

**NOTE:**

1. For direct actuators P adopted spring range is 20 – 100 kPa
2. For electric and other actuators  $\Delta p$  value can be calculated using above formula and data from Tables 12 and 14, taking nominal load capacity as available force  $F_s$ , as per actuator catalog chart.
3. For balanced valve plugs available force  $F_s$  at least equal to  $F_D$  value for soft valve seats in Table 12 should be adopted.

Table 15. Allowable pressure drops  $\Delta p$  [bar] for valves with unbalanced valve plugs and hard valve seats, with pneumatic actuators.

Flow ratio Kvs [m <sup>3</sup> /h]	Valve nominal diameter DN	Stroke [mm]	Air – to – close					Air – to – open

\*DN125 - special execution, technical data according to individual inquiries.

- Note:**
1. In Table 15, theoretical acceptable pressure drops are included. Actual pressure drops with consideration of tolerance of spring manufacture and friction of internal parts of the actuator are lower than those given by 20%. Pressure drops chosen that way guarantee internal tightness of closing of the valves.
  2. In air-to-open valves actuator with spring range of 40-200 [kPa] can be replaced with actuator with spring range of 40-120 [kPa], at the same pressure drops.
  3. In valves with balanced valve plugs and hard valve seats for pressure drops up to  $\Delta p=40$  [bar], actuators are to be selected as below:
    - for air-to-close action: spring range 20-100 [kPa], supply pressure 140 [kPa]
    - for air-to-open action: spring range 40-120 [kPa], or 40-200 [kPa]

Table 16. Allowable pressure drops  $\Delta p$  [bar] for valves with unbalanced valve plugs and soft valve seats, with pneumatic actuators.

Flow ratio Kvs [m <sup>3</sup> /h]	Valve nominal diameter DN	Stroke [mm]	Air – to – close					Air – to – open						
			Actuator		$\Delta p$ [bar]			Actuator		$\Delta p$ [bar]				
			Size	Spring range [kPa]	Supply pressure [kPa]			Size	Spring range [kPa]

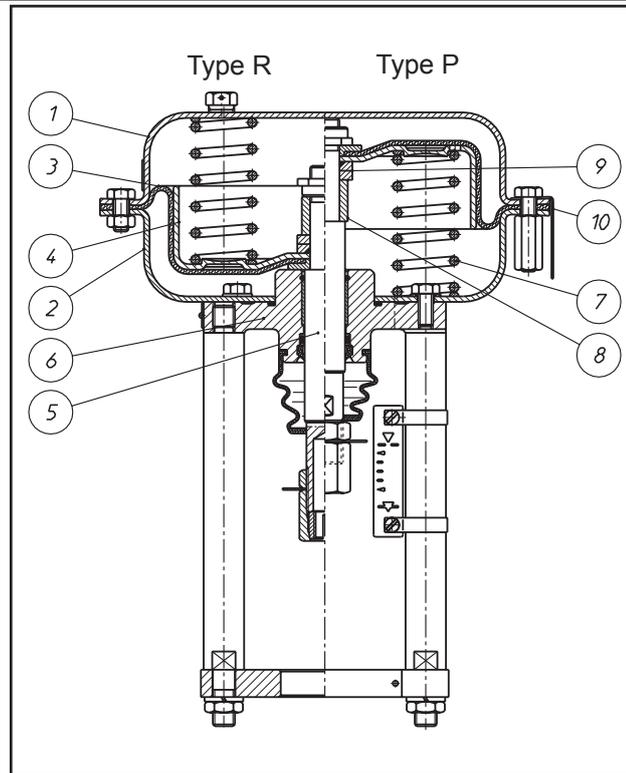

Fig. 5. P/R multi-spring actuator

## 2. Electric actuators

There is a possibility of employing any electric or electro-hydraulic actuator following adjustment of connecting elements. Details and technical specifications of electric actuators as per separate catalog charts.

## 3. NN manual drives

Drives allowing manual operation of valve, adapted to direct assembly on valve (with no extra parts).

Table 18. Drive sizes.

Size	Stroke [mm]	Rev per rated stroke
250	20	5
400	20	5
630	38	9
1000	38; 50; 63	8; 10; 13

## EXTERNAL DIAMETERS AND CONNECTION DIAMETERS, WEIGHTS OF VALVES, PNEUMATIC ACTUATORS AND MANUAL DRIVES

Table 19. Valve connection diameters [mm]

DN	$d_1$	$d_3$	E	L	$L_1$	P	R
15...25	M12x1,25	12	44	125	111	12,5	110
32...50				118	102	16,5	132
65...100		16		122	104	16,5	132
125...250		M16x1,5		20	95	200	180
	98		138		118	24,5	216

### Note:

- 1) R and  $\varnothing P$  can be as per customer request
  - 2) R=160 - for electrical actuators
  - 3) L and  $L_1$  - for valve plug location – valve closed
  - 4) L=138 - for electric actuators
- <sup>\*)</sup>DN125 - special execution, technical data according to individual inquiries.

Note: Dimension A for CL150 and CL300 refers to bodies with valve face B or RF. For other body versions you can calculate A<sub>1</sub> dimension using formulas in Table 21.

Table 21.

Body	Marking		A <sub>1</sub>
	PN	ANSI	
Groove CL300	D1	GF	A <sub>1</sub> = A + 5 x 2
Recess CL300	F1	FF	
Ring-joint CL300 DN15	J	RTJ	A <sub>1</sub> = A + 5,5 x 2
Ring-joint CL150			A <sub>1</sub> = A + 6,5 x 2
Ring-joint CL300 DN20...40			A <sub>1</sub> = A + 8 x 2
Ring-joint CL300 DN50...250			A <sub>1</sub> = A + 8 x 2

Table 22. Valve weights w/o drives [kg].

DN	Valve	
	Standard bonnet	Extended and bellows seal bonnet
15	6	9
20	7	10
25	7,5	11
32	9,5	13
40	11,5	16
50	14,5	20
65	20	28
80	28,5	36,5
100	42	50
125	110	135
150	120	135
200	180	195
250	320	335

Table 23. Actuator weights [kg]

Actuator	Weight
P / R - 250	10
P / R - N - 250	14,5
P / R - 400	16
P / R - N - 400	20,5
P / R - 630	30
P / R - N - 630	37
P / R - 1000	74
P / R - N - 1000	100

Table 24. Manual drive weights [kg]

Drive	Weight
NN - 250	5,5
NN - 400	6,5
NN - 630	8,5
NN - 1000	40

## PARTITION AND MARKING

### Type and action:

- pneumatic with direct action:	P
- pneumatic with reverse action:	R
- pneumatic with top manual drive:	PN; RN
- electric:	E
- manual:	NN

### Bonnet:

- standard:	1
- extension:	2
- bellow seal:	3
- other:	X

### Packing:

- PTFE, braided	A
- PTFE, typ V	B
- PTFE, for oxygen	C
- graphite, braided	D
- graphite, expanded	E
- TA-Luft, PTFE	F
- TA-Luft, graphite	G

### Leakage class:

- basic: class IV	4
- bubble: class IV	6

### Valve plug:

- unbalanced	7
- balanced	8

### Choke cages:

- no choke cages	0
------------------	---

### Plug characteristics and type:

- linear, contoured	L
- equal percentage	P
- quick-opening, (on-off)	S
- other	X

### Body material:

- grey iron	1
- spheroidal iron	2
- carbon steel	3
- stainless steel	5
- other	X

## MARKING EXAMPLE:

Control valve type Z with reverse action pneumatic actuator with top-mounted handweel, extension bonnet, expanded graphite stem sealing, leakage class IV, equal percentage contoured plug, execution in stainless steel:

**RN-Z-2E470P5**

Marking is shown on valve nameplate.

### Additional information:

- nominal size [DN],
- nominal pressure [PN],
- max working temperature [TS],
- max working pressure [PS],
- test pressure [PT],
- flow ratio [Kvs],
- plug stroke [H],
- plug stroke fluid group [1 or 2],
- serial number and year of manufacture.

## ORDERING:

The order should contain all information as per data questionnaire. Full information can be obtained from the Sales and Marketing Department or Technical and Development Department.

**NOTES:**
